

Junior Sustainability/Energy Consultant

Do you want to make the building sector more sustainable? Do you want to contribute to large-scale building and master planning projects? Do you want to work together with the leading companies in the world and separate nonsense from truth? SuReal is looking for you!

SuReal is a fast-growing consultancy firm in Brussels, advising companies (private and public) on sustainable buildings and cities. We deliver studies, certification and project guidance in multiple fields such as carbon, energy, water, thermal comfort,... Our mission is to quantify as much as possible sustainable and circular economy solutions, so that we counter greenwashing. We take truly realistic and future-proof actions with one sole aim: contributing to a more sustainable world. Wanna join?

What you will be doing

- Advise architects, project developers and engineers in designing sustainable buildings
- Perform a wide range of energy, comfort and material studies (using various softwares) : LCC (Life-cycle costs), EPB, daylight, TCO (Total Cost of Ownership), thermal dynamic simulations, carbon accounting, LCA (Life-Cycle Analysis) ... and report on your conclusions
- Contribute to the contents of large, multidisciplinary projects, and later on manage autonomously projects from A to Z (organization, timing, budget)
- Analyse and consolidate the multiple studies in general sustainability and circular economy advise for the project. After your training period, you can grow into the role of project manager, where you are the client's SPOC. You drive and motivate your client to go the extra sustainable mile

You bring

- Master in engineering with specialization in construction, energy, architecture or equivalent through experience
- A knack for numbers, software, technical aspects of energy and driving sustainability
- Interest or first experience in design of sustainable buildings, in project management in the building sector, EPB, dynamic simulations, or other affiliated fields is a big plus
- The urge to make an impact on the building sector, willing to grow your knowledge exponentially & to share know-how with your colleagues
- Sharp organizational skills; taking ownership; experience in drafting clear and well-structured reports
- Strong knowledge of Dutch or French. You speak and write fluently in English

What we offer you

SUREal
