

Summer Job opportunity for Civil Engineer: Innovation & Sustainability

Are you a Civil Engineer student and passionate about sustainability and innovation? Are you eager to make a difference in the building industry?

To stay ahead of the curve, SuReal is seeking a motivated Civil Engineer to join our team for a summer position (August and/or September) focused on tracking the latest trends in sustainability within the building industry.

SuReal is a fast-growing consultancy firm in Brussels, advising companies (private and public) on sustainable buildings and cities. We deliver studies, certification and project guidance in multiple fields such as energy, water, and thermal comfort. We take truly realistic and future-proof actions with one sole aim: contributing to a more sustainable world.

What you will be doing

- Research and monitor advancements in sustainable building practices, including but not limited to energy-efficient systems, carbon-neutral buildings, biobased materials, vegetation and cutting-edge studies
- Analyze data and trends to identify opportunities for integrating sustainable practices into our (client's) projects
- Assist in reports and presentations to communicate findings and recommendations to our team and stakeholders

You bring

- You finished your first Master year Civil Engineering, preferably as an Architect
- Strong interest in sustainability and its application in the building industry
- Excellent research and analytical skills
- Ability to work independently and as part of a team
- Good communication skills, both written and verbal
- Dutch or French is your mother tongue. You speak and write fluently in English

What we offer you

- Gain valuable hands-on experience in the field of sustainable construction
- Work closely with experienced professionals in the industry. You join a team of purpose-driven people with a focus: having a strong impact on society
- Opportunity to contribute to meaningful projects with real-world impact
- Competitive compensation and located a 5-min-walk from Brussel North train station

SUREal

SUSTAINABILITY EXPERTS

If you are ready to dive into the exciting world of sustainable building practices and contribute to a greener future, apply now by sending your resume and a cover letter outlining your interest and qualifications to bieke.aerts@sural.be.

We look forward to hearing from you!
